| VAUXHALL and OPEL | | | | | | | |
| Please question your customers about the terminal fittings used on their vehicle. (i.e. conv./post/pin). Some vehicles have conventional fit distributor cap and pin type coils etc. Another common problem is the vehicle has been fitted with the incorrect distributor cap at some stage during a service or repair i.e. it has a conventional fit type, where it should have a pin fit type. This obviously causes a lot of problems as a lead set is also fitted at the same time to match the incorrect distributor cap. | | | | | | | |
| Engine codes and application notes are the only method we use to recognise the correct lead set for your car - please use them. | | | | | | | |
